DESCRIPTION

- The HyFlex® 11-318 brings a new degree of dexterity to applications with cut risks: it is the first uncoated glove to provide EN Level 3 cut protection in an 18 gauge liner.
- Its ultra light fabric creates a sensation of bare hand contact and helps to maintain the hand at a comfortable working temperature.
- It offers a snug/ergonomic fit on the hand thanks to the spandex reinforcement in the tension areas of the hand (knuckles and palm).
- This low lint glove is also silicone free and anti-static to ensure worker and product protection. Furthermore a specific packaging was developed in order to prevent silicone contamination from plastic bags.

REMARKS

- Antistatic according to EN1149
-
-
- Electrostatic discharge protection

FEATURED TECHNOLOGY

Dyneema®
Diamond
Technology

Best-in-class protection and performance with unmatched comfort

PRIMARY INDUSTRIES

IDEAL APPLICATIONS

- Final assembly of sharp parts
- Packaging
- Quality inspection before painting
